LAYOUT OF CODE LISTS

This document contains the complete set of ONIX serials code lists released as Issue 2, February 2008, laid out as a single set of tables for reference or printing. The tables are in ten columns. The examples below provide a key to the content of code list headers and individual entries.

For some code lists, not all values are meaningful in every instance of the element(s) in which they are used. In such cases, a subset of code values is specified, and identified by a letter (eg List 45A, List 45B etc). These subsets are shown in the code list tables, and they are referenced from the relevant format documentation.
