

## ONIX for Books codelists Issue 37

This is the consolidated list of agreed additions and updates for Issue 37 of the ONIX for Books codelists, as ratified by the ONIX International Steering Committee at its meeting during the London Book Fair in March 2017. A draft of these additions and updates was circulated for comment to the national groups, and comments raised by national groups have been resolved.

As previously announced by the ONIX International Steering Committee and confirmed once again at the London meeting, this issue of the codelists is the first that is not compatible with ONIX 2.1. It contains only those lists required for ONIX 3.0.

For reference, the following lists have been removed from Issue 37:

6, 7, 8, 10, 11, 26, 33, 35–40, 47, 52, 54, 56, 63, 75, 78, 94, 95, 101

A handful of codes in lists 1 and 51 used only with 2.1 have also been removed:

List 1 codes 12, 13, 14; List 51 codes 14, 15, 36

Note that ONIX 2.1 will remain fully usable – using Issue 36 of the codelists or earlier – but it is not intended to be usable with later codelist issues. Issue 36 continues to be available via the archive section of the EDItEUR website (<http://www.editeur.org/15/Archived-Previous-Releases>).

## Codelists Issue 37 Additions and changes

Within the tables, **additions are in red**, **changes and clarifications in blue** and unchanged text is in black.

### List 17 – Contributor role code (addition applies to ONIX 3.0 only)

Code	Label	Note
<b>B30</b>	Historical advisor	
<b>B31</b>	Original editor	Editor of the first edition (usually of a standard work) who is not an editor of the current edition

### List 44 – Name code type (addition applies to ONIX 3.0 only)

Code	Label	Note
<b>36</b>	Nasjonalt autoritetsregister	Nasjonalt autoritetsregister for navn – Norwegian national authority file for personal and corporate names

### List 45 – Publishing role code

Code	Label	Note
<b>14</b>	Publication funder	Body funding publication fees, if different from the body funding the underlying research. <b>Intended primarily</b> for use with open access publications

<b>15</b>	Research funder	Body funding the research on which publication is based, if different from the body funding the publication. <b>Intended primarily</b> for use with open access publications
<b>16</b>	Funding body	Body funding research and publication. <b>Intended primarily</b> for use with open access publications

These minor changes clarify that these codes may occasionally be used with research-based and other publications that are available with conventional, non-open licenses. But in many cases the existing code 03, Sponsor, may be more appropriate for publications – particularly those that are not research-based – where a party provides commercial sponsorship of the publication.

Note that the presence or absence of these codes is not necessarily indicative of the open access status of the publication. For this, use an Open Access Statement (in ONIX 3.0, code 20 in list 153; for ONIX 2.1, code 47 in list 33), which acts both as a ‘flag’ to indicate the open access status and a short piece of text that may summarise some key detail or limitation of the open licence – for example, the statement may indicate “Open Access – not for commercial reuse”.

This *clarification* of meaning applies to use of these codes in ONIX 2.1 and ONIX 3.0 (but ONIX 2.1 users must continue to use Issue 36 which does not include this text update).

### List 65 – Availability (addition applies to ONIX 3.0 only)

Code	Label	Note
<b>09</b>	Not yet available, postponed indefinitely	Not yet available, publisher indicates that it has been postponed indefinitely. Should be used in preference to code 10 where the publisher has indicated that a previously-announced publication date is no longer correct, and no new date has been announced

### List 81 – Product content type

Code	Label	Note
<b>10</b>	Text (eye-readable)	Readable text of the main work: this value is required, together with applicable <ProductForm> and <ProductFormDetail> values, to designate an e-book or other digital or physical product whose primary content is eye-readable text
<b>16</b>	Additional eye-readable text not part of main work	<del>E</del> Publication is enhanced with additional textual content such as interview, feature article, essay, bibliography, quiz/test, other background material or text that is not included in a primary or ‘unenhanced’ version
<b>20</b>	Additional images / graphics not part of main work	<del>E</del> Publication is enhanced with additional images or graphical content such as supplementary photographs that are not included in a primary or ‘unenhanced’ version

These minor changes ensure these codes are not exclusive to e-publications. ONIX tags for <ProductContent> and (in ONIX 3.0) <PrimaryContent> are *primarily* intended for e-publications, but may also be used with physical products. For obvious reasons, existing codes 14 and 15 indicating the product contains hyperlinks remain exclusive to e-publications.

This *clarification* of meaning applies to use of these codes in ONIX 2.1 and ONIX 3.0 (but ONIX 2.1 users must continue to use Issue 36 which does not include this text update).

**List 93 – Supplier role (additions apply to ONIX 3.0 only)**

Code	Label	Note
<b>13</b>	Exclusive distributor to retailers and end-customers	Intermediary as exclusive distributor to retailers and direct to consumers and/or institutional customers
<b>14</b>	Non-exclusive distributor to retailers and end-customers	Intermediary as non-exclusive distributor to retailers and direct to consumers and/or institutional customers
<b>15</b>	Distributor to retailers and end-customers	Use only where exclusive/non-exclusive status is not known. Prefer 13 or 14 as appropriate whenever possible

These new codes are intended to allow a supplier to indicate the (physical) product is available for 'drop-shipment' direct to the end-customer as well as via normal retail channels.

**List 139 – ONIX retail sales outlet ID (addition applies to ONIX 3.0 only)**

Code	Label	Note
<b>BDZ</b>	BDBuzz	<a href="http://www.bdbuzz.net">www.bdbuzz.net</a>

**List 145 – Usage type (ONIX 3.0 only)**

Code	Label	Note
<b>08</b>	Loan renewal	Maximum number of consecutive loans or loan extensions (eg from a library) to a single device owner or account holder. Note that a limit of 1 indicates that a loan cannot be renewed or extended

**List 150 – Product form (ONIX 3.0 only)**

Code	Label	Note
<b>AE</b>	Audio disc	Audio disc (excluding CD-Audio): use for 'yellow book' (CD-Rom-style) discs, including for example mp3 CDs, and use coding in Product Form Detail to specify the format of the data on the disc

**List 156 – Cited content type (ONIX 3.0 only)**

Code	Label	Note
<b>05</b>	Curated list	For example a 'best books of the year' or '25 books you should have read' list, compiled without regard to their bestseller status

**List 175 – Product form detail code (ONIX 3.0 only)**

Code	Label	Note
<b>E146</b>	BRF	Electronic Braille file

**List 196 – E-publication accessibility details (addition applies to ONIX 3.0 only)**

Code	Label	Note
<b>00</b>	Accessibility summary	<ProductFormFeatureDescription> contains a short explanatory summary of the accessibility of the product, consistent with the more specific conformance and feature details provided. The summary should note both the accessibility features and any potential deficiencies. More details information may be provided using codes 94-97

**List 230 – Price constraint type (ONIX 3.0 only)**

Code	Label	Note
<b>08</b>	Loan renewal	Maximum number of consecutive loans or loan extensions (eg from a library) to a single device owner or account holder. Note that a limit of 1 indicates that a loan cannot be renewed or extended
