ONIX for Books: Code Lists Issue 8

21 April 2008

Note: text in blue indicates a change in the description of an existing code.

List 5 (Product identifier type)

New code value requested by Germany and Finland, in both cases in connection with library applications where ONIX feeds will be used. A URN differs from other product identifier types in that it provides a syntax for specifying both an identifier type and the identifier value, and indeed an ISBN can be expressed as a URN. For trade applications, it is emphasised that an ISBN-as-URN is not an acceptable substitute for the EAN-13 representation of the ISBN. See also List 13.

22	URN	Uniform Resource Name

List 6 (Barcode indicator)

New code values and redefinition of existing codes requested by BISAC, on the basis that the US is the only market in which these values are used.

List 7 (Product form code)

Clarification of the description of existing code value AC was requested by the US and by Norway, and was announced on the ONIX listserv in August 2007. The change in the description of code BC from "paperback" to "paperback / softback" was requested by the UK, to better reflect the scope of the code, and to facilitate its use with codes in List 78 for binding materials such as "vinyl". The change in the description of code BO from "Leporello" to "fold-out book or chart" arose from a request from BISAC, and clarification of the way the term "Leporello" is used in Germany. New code value PR requested by the UK and Germany. New code value PS requested by Finland. New code value PT requested by the UK (note that a new code in List 78 for a "bookmark calendar" was requested by Germany).

List 38 (Image/audio/video file type code)

New code values 24 to 26 requested by the Netherlands and Spain.

The UK ONIX group proposed a substantial and systematic expansion of this list to cover the range and variety of material that authors and publishers may now use to support and promote their products. To make the resulting list more consistent, the UK also proposed that the descriptions of several existing codes should be changed, without in general changing their meaning. The revised

scheme classifies media files into four groups: image, video, audio, and application (for software products). See also notes on List 73.

Germany requested a new code for "screenshot". Under the new scheme, this is covered by code 23, which is extended to cover any still image of sample content, not only pages from a book.

09	Supplier's alternative net price including tax	Unit price charged by supplier to a specified class of reseller including any sales tax or value-added tax: goods for retail sale (this value is for use only in countries, eg Finland, where trade practice requires two different net prices to be listed for different classes of resellers, and where national guidelines specify how the code should be used)

List 71 (Sales restriction type code)

New code value requested by the UK.

07	Schools only edition	For sale directly to schools only; not for sale through retail trade

List 73 (Website role)

New code values requested by the UK.

Given the considerable expansion of List 38, there could be some uncertainty as to the correct use of the Media File composite as opposed to the Product Website composite. The underlying distinction is that Media File and List 38 are to be used for files, usually held at an online location. Given the right application, it should be possible to open the file directly from the location provided. Examples might be:

http://download.guardian.co.uk/sys-audio/Guardian/Science/2007/07/30/ScienceExtra_IanMcEwan.mp3
http://www.randomhouse.com/catalog/mm/audio/4s_9780739341506.mp3

Product Website and List 73 should be used for web pages where particular resources can be found (eg by clicking on a link on that page). Examples might be:

http://www.meettheauthor.co.uk/bookbites/1086.html
http://www.booklounge.ca/multimedia/haddonmark/index_podcast.html

Or, as a rule of thumb: HTML pages should generally be in Product Website and not in Media File.

23	Author blog	
24	Web page for author presentation / commentary	
25	Web page for author interview	
26	Web page for author reading	
27	Web page for cover material

29	Web page for full content	
30	Web page for other commentary / discussion

syc	Classical Syriac	
zbl	Blissymbols; Blissymbolics; Bliss	

List 76 (Product form feature value - DVD region codes)

The UK requested a value for Blu-Ray Region B. The opportunity has therefore been taken to add codes for all Blu-Ray regions, and to update the descriptions of DVD region codes and make them more consistent.

C	Blu-Ray region C	India, Bangladesh, Nepal, Mainland China, Pakistan, Russia, Ukraine, Belarus, Central, and South Asia.

List 77 (US school or college grade)

No new values are requested, but Canada has suggested that the list be renamed "**North American school or college grade**", since the same grade designations can be used for Canada. However, separate codes are defined in List 30 for "US" and "Canada" (see above) to specify whether grading has been assessed in accordance with US or Canadian criteria.

List 78 (Product form detail)

New code value B411 was requested by Finland, on the basis that, although "Velvet" can be specified in List 99, it is sufficiently common – compared with other binding materials in that list – to justify its inclusion in List 78.

The UK requested new code B412, and the redefinition of existing codes B407 and B408, to make it easier to describe flexible-cover softbacks where the actual material is unknown or irrelevant. This strictly requires B407 and B408 to be "deprecated". New code B602 also requested by the UK.

New codes A201 to A212 and B701 to B703 were requested by the UK in connection with developments being undertaken with the Royal National Institute for the Blind. See www.daisy.org for information about the Daisy standard for audio materials for the sight-impaired. Regarding Braille, and quoting from notes supplied by the UK ONIX group: "The main types of Standard English Braille are Grade 1 and Grade 2. Grade 1 has single letters only. Grade 2 has some two-letter combinations. US Braille has significant differences."

New code value L101 was requested by BISAC to cover laminated sheet or fold-out products, and it was thought advisable to add B415 for books with laminated covers, to avoid confusion.

New code value P109 was requested by Germany (note that a new code in List 7 for a "bookmark" was requested by the UK). New code values P110 to P114 were requested by Finland.

New code values AQ and GC requested by Finland, to cover collections of Apocryphal texts that do not match the canons specified by existing codes. The descriptions of two existing codes have been expanded to remove any possible ambiguity.

AP	Apocrypha (Catholic canon)	*Description of existing code expanded to remove ambiguity: detailed notes unchanged*
AQ	Apocrypha (canon unspecified)	A collection of Apocryphal texts, canon not specified
GA	General canon with Apocrypha (Catholic canon)	*Description of existing code expanded to remove ambiguity: detailed notes unchanged*

FRK	Raamattu kansalle	Finnish Bible translation
FRT	Raamattu (1992)	Finnish Bible translation
SBB	Bibel 2000	Swedish Bible translation

List 85 (Bible purpose)

It has been pointed out that there is an apparent conflict between the wording that describes PR.10.9, which refers to "a Bible or selected Biblical text", and the wording of the code list definitions, which repeatedly say only "a Bible". The definitions have been edited to match the description of PR.10.9, to make it clear that they can apply to selected texts as well as complete Bibles.

List 91 (Country code)

New code values resulting from updates to ISO 3166-1.

BL	Saint Barthelemy	
MF	Saint Martin	French part

List 93 (Supplier role)

New code value 03 required to accompany new List 139 (see next page).

02	BIC sales outlet ID code	**DEPRECATED** - use code 03
03	ONIX sales outlet ID code	From List 139. Use of List 139 indicates only that the publisher will supply the product exclusively to the company whose name is identified by the selected code. It does not imply anything about geographical or other onward sales rights. Companies that operate in more than one country, and companies that have both bricks-and-mortar and Internet businesses, will be assigned only a single code unless it can be shown that there are strong practical reasons for doing otherwise.

List 138 (Transliteration scheme code)

New list requested by Finland, to be used in the *transliteration* attribute. Because of uncertainty about the range and variety of schemes that might be requested in future, the actual reference number of the standard has been used as the code, which should be regarded as variable-length even though all the initial group share the same format.

SFS4900	Finnish standard SFS 4900	Transliteration of Cyrillic characters - Slavic languages
SFS5807	Finnish standard SFS 5807	Transliteration and transcription of Greek characters

List 139 (ONIX sales outlet IDs)

New list, covering sales outlet IDs for retailers and other companies for which publishers produce exclusive editions, to be used in PR.21.16 <IDValue> when PR.21.14 <SalesOutletIDType> has the value 03 from List 102. The "starter list" below has come from the UK and from BISAC, but includes a few names from other English-speaking countries.

After discussion between BIC and BISAC, it was decided that the list should identify company names only, without any territorial or other elements, unless experience showed that it was both necessary and practical to distinguish other attributes.
