LAYOUT OF CODE LISTS

This document contains ONIX Books code lists Issue 10 for Release 2.1, July 2009, laid out as a single set of tables for reference or printing. Issue 10 also contains a number of new lists or new values specifically for ONIX Books Release 3.0, but these are included in this document only in those cases where they are also visible in Release 2.1 schemas.

The tables are in five columns. The examples below provide a key to the content of code list headers and individual entries.

Code list header

7		Product form code		0
---	--	--------------------------	--	---

Column 1 Code list number
 Column 2 Not used in a list header line
 Column 3 List name
 Column 4 Not used in a list header line
 Column 5 The number of the code list Issue in which the list was added. Zero for all lists which were added before Issue 1, and for new lists for which values have not yet been assigned.

Code list entry

21	SCH	School edition	An edition intended specifically for use in schools.	0
----	-----	----------------	--	---

Column 1 Code list number
 Column 2 Code value
 Column 3 Code description
 Column 4 Notes on the meaning and usage of the code
 Column 5 The number of the code list Issue in which the value was added or the description and notes were last revised. Zero for all values which were added before Issue 1, except where there has been a change in status in a later Issue.

Color coding

Entries that are new in Issue 10, or where the definition has been clarified, are shown in blue:

9	07	Sender's product category	A product category (<i>not</i> a subject classification) assigned by the sender	10
---	----	---------------------------	--	----

In a very few cases, values which have been added to a list for use in ONIX Books Release 3.0, but which are visible in ONIX 2.1 schemas, are shown shaded pale blue:

23	07	Absolute page count	The total number of pages of the book counting the cover as page 1. This page count type should be used only for digital publications.	9
----	----	---------------------	---	---

ONIX BOOKS CODE LISTS Issue 10, April 2008

	Value	Description	Notes	
1		Notification or update type code		0
1	01	Early notification	Use for a complete record issued earlier than approximately six months before publication.	0
1	02	Advance notification (confirmed)	Use for a complete record issued to confirm advance information approximately six months before publication; or for a complete record issued after that date and before information has been confirmed from the book-in-hand.	0
1	03	Notification confirmed from book-in-hand	Use for a complete record issued to confirm advance information using the book-in-hand at or just before actual publication date; or for a complete record issued at any later date.	0
1	04	Update (partial)	Intended to be used for an update to a part of the record which is sent without re-issuing the complete record. In practise, however, ONIX updating is invariably by complete record replacement using code 03, and code 04 is not used.	0
1	05	Delete	Use when sending an instruction to delete a record which was previously issued. Note that a delete instruction should NOT be used when a product is cancelled, put out of print, or otherwise withdrawn from sale: this should be handled as a change of availability status, leaving the receiver to decide whether to retain or delete the record. A delete instruction is only used when there is a particular reason to withdraw a record completely, eg because it was issued in error.	0
1	08	Notice of sale	Notice of sale of a product, from one publisher to another: sent by the publisher disposing of the product	2
1	09	Notice of acquisition	Notice of acquisition of a product, by one publisher from another: sent by the acquiring publisher	2
1	12	Update - SupplyDetail only	ONIX Books supply update - SupplyDetail only	7
1	13	Update - MarketRepresentation only	ONIX Books supply update - MarketRepresentation only	7
1	14	Update - SupplyDetail and MarketRepresentation	ONIX Books supply update - both SupplyDetail and MarketRepresentation	7
3		Record source type code		0
3	00	Unspecified		0
3	01	Publisher		0
3	02	Publisher's distributor	Use to designate a distributor providing warehousing and fulfilment for a publisher or for a publisher's sales agent, as distinct from a wholesaler	0
3	03	Wholesaler		0
3	04	Bibliographic agency		0
3	05	Library bookseller		0
3	06	Publisher's sales agent	Use for a publisher's sales agent responsible for marketing the publisher's products within a territory, as opposed to a publisher's distributor who fulfils orders but does not market	4
5		Product identifier type code		0
5	01	Proprietary	For example, a publisher's or wholesaler's product number.	0
5	02	ISBN-10	International Standard Book Number, pre-2007, unhyphenated (10 characters)	0
5	03	GTIN-13	GS1 Global Trade Item Number, formerly known as EAN article number (13 digits)	0
5	04	UPC	UPC product number (12 digits)	0
5	05	ISMN	International Standard Music Number (10 digits)	0
5	06	DOI	Digital Object Identifier (variable length and character set)	0
5	13	LCCN	Library of Congress Control Number (12 characters, alphanumeric)	1
5	14	GTIN-14	GS1 Global Trade Item Number (14 digits)	1
5	15	ISBN-13	International Standard Book Number, from 2007, unhyphenated (13 digits)	4

	Value	Description	Notes	
5	17	Legal deposit number	The number assigned to a publication as part of a national legal deposit process	7
5	22	URN	Uniform Resource Name: note that in trade applications an ISBN must be sent as a GTIN-13 and, where required, as an ISBN-13 - it should not be sent as a URN	8
5	23	OCLC number	A unique number assigned to a bibliographic item by OCLC	9
5	24	Co-publisher's ISBN-13	An ISBN-13 assigned by a co-publisher. The 'main' ISBN sent with ID type code 03 and/or 15 should always be the ISBN that is used for ordering from the supplier identified in Supply Detail. However, ISBN rules allow a co-published title to carry more than one ISBN. The co-publisher should be identified in an instance of the <Publisher> composite, with the applicable <PublishingRole> code.	9

58	25	Supplier's pre-publication net price excluding tax	Unit price charged by supplier to reseller pre-publication excluding any sales tax or value-added tax	0
58	31	Freight-pass-through RRP excluding tax	In the US, books are sometimes supplied on 'freight-pass-through' terms, where a price that is different from the RRP is used as the basis for calculating the supplier's charge to a reseller. To make it clear when such terms are being invoked, code 31 is used instead of code 01 to indicate the RRP. Code 32 is used for the 'billing price'.	3
58	32	Freight-pass-through billing price excluding tax	When freight-pass-through terms apply, the price on which the supplier's charge to a reseller is calculated, ie the price to which trade discount terms are applied. See also code 31.	3

61	00	Unspecified	Default	0
61	01	Provisional		0
61	02	Firm		0
62		Tax rate, coded		0
62	H	Higher rate	Specifies that tax is applied at a higher rate than standard	5
62	P	Tax paid at source (Italy)	Under Italian tax rules, VAT on books may be paid at source by the publisher, and subsequent transactions through the supply chain are tax-exempt.	7
62	R	Lower rate	Specifies that tax is applied at a lower rate than standard	0
62	S	Standard rate		0
62	Z	Zero-rated		0
64		Publishing status		2
64	00	Unspecified	Status is not specified (as distinct from unknown): the default if the <PublishingStatus> element is not sent. Also to be used in applications where the element is considered mandatory, but the sender of the ONIX message chooses not to pass on status information.	2
64	01	Cancelled	The product was announced, and subsequently abandoned; the <PublicationDate> element must not be sent.	2
64	02	Forthcoming	Not yet published, must be accompanied by expected date in <PublicationDate>.	2
64	03	Postponed indefinitely	The product was announced, and subsequently postponed with no expected publication date; the <Publication Date> element must not be sent.	2
64	04	Active	The product was published, and is still active in the sense that the publisher will accept orders for it, though it may or may not be immediately available, for which see <SupplyDetail>.	2
64	05	No longer our product	Ownership of the product has been transferred to another publisher (with details of acquiring publisher if possible in PR.19 (ONIX 2.1) OR P.19 (ONIX 3.0)).	2
64	06	Out of stock indefinitely	The product was active, but is now inactive in the sense that (a) the publisher cannot fulfil orders for it, though stock may still be available elsewhere in the supply chain, and (b) there are no current plans to bring it back into stock. Use this code for 'reprint under consideration'. Code 06 does not specifically imply that returns are or are not still accepted.	2
64	07	Out of print	The product was active, but is now permanently inactive in the sense that (a) the publisher will not accept orders for it, though stock may still be available elsewhere in the supply chain, and (b) the product will not be made available again under the same ISBN. Code 07 normally implies that the publisher will not accept returns beyond a specified date.	2
64	08	Inactive	The product was active, but is now permanently or indefinitely inactive in the sense that the publisher will not accept orders for it, though stock may still be available elsewhere in the supply chain. Code 08 covers both of codes 06 and 07, and may be used where the distinction between those values is either unnecessary or meaningless.	2
64	09	Unknown	The sender of the ONIX record does not know the current publishing status.	2

	Value	Description	Notes	
64	10	Remaindered	The product is no longer available from the current publisher, under the current ISBN, at the current price. It may be available to be traded through another channel. A Publishing Status code 10 'Remaindered' usually but not always means that the publisher has decided to sell off excess inventory of the book. Copies of books that are remaindered are often made available in the supply chain at a reduced price. However, such remainders are often sold under a product identifier that differs from the ISBN on the full-priced copy of the book. A Publishing Status code 10 'Remaindered' on a given product record may or may not be followed by a Publishing Status code 06 'Out of Stock Indefinitely' or 07 'Out of Print': the practice varies from one publisher to another. Some publishers may revert to a Publishing Status code 04 "Active" if a desired inventory level on the product in question has subsequently been reached. No change in rights should ever be inferred from this (or any other) Publishing Status code value.	3
64	11	Withdrawn from sale	Withdrawn, typically for legal reasons or to avoid giving offence	9
64	12	Recalled	Recalled for reasons of consumer safety	9
65		Product availability		2
65	01	Cancelled	Cancelled: product was announced, and subsequently abandoned	2
65	10	Not yet available	Not yet available (requires <ExpectedShipDate>, except in exceptional circumstances where no date is known)	2
65	11	Awaiting stock	Not yet available, but will be a stock item when available (requires <ExpectedShipDate>, except in exceptional circumstances where no date is known). Used particularly for imports which have been published in the country of origin but have not yet arrived in the importing country.	2
65	12	Not yet available, will be POD	Not yet available, to be published as print-on-demand only. May apply either to a POD successor to an existing conventional edition, when the successor will be published under a different ISBN (normally because different trade terms apply); or to a title that is being published as a POD original.	5
65	20	Available	Available from us (form of availability unspecified)	2
65	21	In stock	Available from us as a stock item	2
65	22	To order	Available from us as a non-stock item, by special order	2

65	31	Out of stock	Stock item, temporarily out of stock (requires <ExpectedShipDate>, except in exceptional circumstances where no date is known)	2
65	32	Reprinting	Temporarily unavailable, reprinting (requires <ExpectedShipDate>, except in exceptional circumstances where no date is known)	2
65	33	Awaiting reissue	Temporarily unavailable, awaiting reissue (requires the <Reissue> composite, and <ExpectedShipDate>, except in exceptional circumstances where no date is known)	2
65	40	Not available	Not available from us (reason unspecified; if the reason is rights-related, it should be specified in PR.21 (ONIX 2.1) OR P.21 (ONIX 3.0))	2
65	41	Replaced by new product	This product is unavailable, but a successor product or edition is or will be available from us (identify successor in <RelatedProduct>)	2
65	42	Other format available	This product is unavailable, but the same content is or will be available from us in an alternative format (identify other format product in <RelatedProduct>)	2
65	43	No longer supplied by us	Identify new supplier in <NewSupplier> if possible	2
65	44	Apply direct	Not available to trade, apply direct to publisher	2
65	45	Not sold separately	Must be bought as part of a set (identify set in <RelatedProduct>)	2
65	46	Withdrawn from sale	May be for legal reasons or to avoid giving offence	2
65	47	Remaindered	Remaindered	2
65	48	Out of print, replaced by POD	Out of print, but a print-on-demand edition is or will be available under a different ISBN. Use only when the POD successor has a different ISBN, normally because different trade terms apply.	5

	Value	Description	Notes	
65	49	Recalled	Recalled for reasons of consumer safety	9
65	50	Not sold as set	When a collection that is not sold as a set nevertheless has its own ONIX record	10
65	98	No longer receiving updates	Publisher/supplier is no longer providing updates to sender	9
65	99	Contact supplier	Availability not known to sender	2
66		BISAC returnable indicator	From <i>BISAC Implementation Guideline for EDI, Version 3, Release 6, Section 832: Price/Sales Catalog</i>	2
66	Y	Yes, returnable, full copies only		2
66	N	No, not returnable		2
66	C	Conditional	Contact publisher for requirements and/or authorization	2
66	S	Yes, returnable, stripped cover		2
67		Market date role		3
67	01	Local publication date	The date on which the product is expected to be first published in this market, or – after publication – the date on which it was published in this market. There may or may not be a strict embargo on retail sales before the expected date; if there is, it should be specified separately as an embargo date.	3
67	02	Consumer on sale date / embargo date	If there is an embargo on retail sales in this market before a certain date, the date from which the embargo is lifted and retail sales are permitted	3
68		Market publishing status		3
68	00	Unspecified	Status is not specified (as distinct from unknown): the default if the <MarketPublishingStatus> element is not sent.	3
68	01	Cancelled	The product was announced for publication in this market, and subsequently abandoned.	3
68	02	Forthcoming	Not yet published in this market, should be accompanied by expected local publication date..	3
68	03	Postponed indefinitely	The product was announced for publication in this market, and subsequently postponed with no expected local publication date.	3
68	04	Active	The product was published in this market, and is still active in the sense that the publisher will accept orders for it, though it may or may not be immediately available, for which see <SupplyDetail>.	3
68	05	No longer our product	Responsibility for the product in this market has been transferred elsewhere.	3
68	06	Out of stock indefinitely	The product was active, but is now inactive in the sense that (a) no further stock is expected to be made available in this market, though stock may still be available elsewhere in the supply chain, and (b) there are no current plans to bring it back into stock.	3
68	07	Out of print	The product was active, but is now permanently inactive in the sense that (a) no further stock is expected to be made available in this market, though stock may still be available elsewhere in the supply chain, and (b) the product will not be made available again under the same ISBN.	3
68	08	Inactive	The product was active, but is now permanently or indefinitely inactive in the sense that no further stock is expected to be made available in this market, though stock may still be available elsewhere in the supply chain. Code 08 covers both of codes 06 and 07, and may be used where the distinction between those values is either unnecessary or meaningless.	3
68	09	Unknown	The sender of the ONIX record does not know the current publishing status in this market.	3
68	10	Remaindered	The product is no longer available in this market from the local publisher, under the current ISBN, at the current price. It may be available to be traded through another channel, usually at a reduced price.	3
68	11	Withdrawn from sale	Withdrawn from sale in this market, typically for legal reasons	3
68	12	Not available in this market	Either no rights are held for the product in this market, or for other reasons the publisher has decided not to make it available in this market	3
68	13	Active, but not sold separately	The product is published in this market and active but, as a publishing decision, it is not sold separately – only in an assembly or as part of a package	3

	Value	Description	Notes	
68	14	Active, with market restrictions	The product is published in this market and active, but is not available to all customer types, typically because the market is split between exclusive sales agents for different market segments. In ONIX 2.1, should be accompanied by a free-text statement in <MarketRestrictionDetail> describing the nature of the restriction. In ONIX 3.0, the <SalesRestriction> composite in Group P.24 should be used.	3
69		Agent role		3
69	05	Exclusive sales agent	Publisher's exclusive sales agent in a specified territory	3
69	06	Non-exclusive sales agent	Publisher's non-exclusive sales agent in a specified territory	3
69	07	Local publisher	Publisher for a specified territory	3
69	08	Sales agent	Publisher's sales agent in a specific territory. Use only where exclusive / non-exclusive status is not known. Prefer 05 or 06 as appropriate, where possible.	7
