The Keepers Registry – a brief overview

Fred Guy,
Project Manager,
EDINA, University of Edinburgh
March 2012
The role of the Keepers

The carrying out of archiving activities to ensure long term access to the materials

Note

The Keepers Registry is for e-journals but some Keepers include other formats (eg. e-books)
The Registry

Bringing together the data from the different sources and presenting in a coherent and easily understandable way
The Keepers Registry

Agency metadata

Agency metadata

Agency metadata

Agency metadata

Agency metadata
• Formats used for data supply– spreadsheets etc.

• Information supplied – extent (volume, date etc; vocabulary used to express status)
Standard submission of metadata—ONIX for Preservation Holdings

Publishers

Keepers

The Keepers Registry
Looking for a standard way in which data could be delivered/supplied by the keepers (rather than differently formatted spreadsheets)

ONIX for Serials (SOH) known to us because of AIMSS project (data supply from Serials Solutions to EDINA)

Specific preservation requirements included: preservation status; identification of gaps in holdings; authority/source of holdings information (archiving agency is not a subscriber)

EDItEUR contacted and this led to establishment of a Working Group comprising key parties including representatives from the Keeper organisations
