Overview

Data Elements

Code Sets

Formats

Roots of ONIX

- 1997 EPICS and BIC Basic
- 1998 <indec> project
- 1998 W₃C XML specification
- 1999 'Online Information Exchange' initiative from AAP Digital Issues working party
 - ONIX developed by EDItEUR, originally in collaboration with BISG (USA) and BIC (UK)
 - March 2000 – ONIX International v1.0

Roots of ONIX

support
for 2.1 was
reduced at
end of 2014

- **current status**
 - managed by EDItEUR and international steering committee
 - June 2003 ONIX v2.1 – most widely deployed
 - April 2009 ONIX v3.0 – growing in importance 
- widely used in North America, Western Europe, Japan, parts of Eastern Europe and Russia, Korea, growing in China
- responsive to changes in business requirements

Iterating ONIX

- version 3.0.3 in preparation now for Jan 2016 
- release of ONIX Acknowledgement message 
- continued development of controlled vocabularies (“codelists”) 
- mapping key data elements to schema.org 
- translated documentation
