

Thema version 1.3, April 2018 – additions and changes

This is the list of additions and changes in *Thema* v1.3 approved by the *Thema* international steering committee at the London Book Fair in April 2018. Version 1.3 is fully back-compatible with version 1.2 (in principle, no existing data needs to be modified or updated *). These additional codes and modifications were the result of 10 months of work done by a working group set up by the *Thema* International Steering Committee. Proposals and suggestions came from *Thema* National user groups and from companies or individuals who are already working with *Thema*. The working group looked at each addition and modification in detail, judging the merits of each proposal and the requirements within the book supply chain. They looked at each proposal in the light of existing codes and roughly how many currently published titles exist for that subject, and spent time considering how easy it is to classify a title using an existing subject code or a combination of subject codes plus qualifiers. The final recommendations of the working group were then ratified by the Steering Committee.

* Version 1.3 documentation also includes one correction: code 1DTK-SK-B introduced in November 2017 was inadvertently listed as 1DTK-SL-B in some documents. This has also been corrected in EDItEUR's documentation for version 1.2, and should be corrected in all existing data.

In summary, 261 new core subject codes have been added for *Thema* v1.3, taking the total number of core subject codes to 2971. There are also 397 modifications to core subject codes – most of which are just modifications to the notes – but 127 are modifications to the wording (though not the meaning) of the headings.

<i>Thema</i> category	New codes	Modifications
A – The Arts	12	25
C – Language & Linguistics	–	17
D – Biography, Literature & Literary studies	3	9
F – Fiction & Related items	18	27
G – Reference, Information & Interdisciplinary subjects	1	5
J – Society & Social Sciences	19	37
K – Economics, Finance, Business & Management	28	25
L – Law	3	4
M – Medicine & Nursing	4	11
N – History & Archaeology	–	13
P – Mathematics & Science	9	8
Q – Philosophy & Religion	8	5
R – Earth Sciences, Geography, Environment, Planning	2	4
S – Sports & Active outdoor recreation	13	20
T – Technology, Engineering, Agriculture, Industrial processes	11	19

V – Health, Relationships & Personal development	22	16
W – Lifestyle, Hobbies & Leisure	23	46
X – Graphic novels, Comic books, Cartoons	6	5
Y – Children's, Teenage & Educational	69	94

For Qualifiers there are 153 new codes. Of the 98 new Place Qualifier codes, 55 are new national extensions from the Japanese national group & 10 from the Czechia / Slovakia interest group.

Thema Qualifier	New codes	Modifications
1 – Place qualifiers	98	17
2 – Language qualifiers	1	5
3 – Time period qualifiers	4	26
4 – Educational purpose qualifiers	22	9
5 – Interest qualifiers	26	13
6 – Style qualifiers	2	7

More clarity has been added to both headings and notes, especially where the meaning of certain headings or notes may not have been always clear for translation purposes. There has also been a great deal of standardisation work done on the notes, and this accounts for a high proportion of the updates.

The notes have also been standardised so that the different types are clearer. As of version 1.3 these are:

- 1) Class here: these are other subject headings, or alternative headings that are visible to the user
- 2) Use for: these are notes that give some extra detail about the heading
- 3) Use with: this is where suggested combinations of codes are given

The 'see also' notes are still present as separate columns on the spreadsheets.

As examples of these changes:

FBAN – 'Street' Fiction Class here: urban fiction. Use for: stories, usually set in urban, inner-city enclaves, that are often dark, focusing on the underside of city life

WMP – Gardening: plants & cultivation guides Class here: herbs, succulents & cacti. Use for: titles about the growing of or guides to any type of garden plant, both indoor and outdoor. Use with: WMQG for house plants

KCZ – Economic history Use with: NH* codes if appropriate & PLACE 1* and TIME PERIOD 3* Qualifiers as appropriate

*NB The * indicates that the 'use with' note means 'any code beginning with NH'*

NHT – History: specific events & topics. Use with: (all NHT* codes) regional NH* codes where possible and other subject codes to give more detail and also PLACE 1* and/or TIME PERIOD 3* Qualifiers as appropriate

NB The use of a code inside the brackets means the note applies to this code and all of its child codes. In this example, the note can be applied to all the core subject codes that start with NHT.

Within the following table, **additions are in red**, any **changes and clarifications in teal** and unchanged text is in black. (If a line has no colours but black, then it implies something has been removed from the text.) The main *Thema* spreadsheets (available from the EDItEUR website) show all the changes in context, and the online browser can also show when a code was added or changed.
