

Additions to *Thema* v1.4 national extensions – October 2020

This is the list of additions and updates to the *Thema* national extensions for October 2020 that were approved by the *Thema* International Steering Committee members at the virtual meeting on Wednesday 14th October 2020. The additions consist of new place qualifiers and time periods from the Belgian and Dutch groups and a range of educational purpose qualifiers for use in Belgium or Finland. These are only national extensions and the version of *Thema* will remain as v1.4 – this version will be labelled as v1.4.2 (v1.4.1 was to update some typos found after initial publication of v1.4). As with all updates to *Thema* this remains fully backward compatible and national qualifiers can be mapped back to their root code, if an implementor does not want this level of detail. Also, as with all national extensions, anyone can use them, not just users in the country that proposed them, if they are relevant in a market.

Within the tables, **additions are in red**, any **changes and clarifications in teal** and unchanged text is black.

Belgian national extensions – Place qualifiers
